

# Sustainability in Loudoun County Public Schools

## OVERVIEW

Since 2014, Loudoun County Public Schools has improved energy efficiency across its portfolio and monetized over 1.5 MWs from **over 100 energy efficiency projects**. Working with CPower, Loudoun County Public Schools has received capacity rewards for its efforts to reduce electrical consumption through a variety of project types including **lighting retrofits, green buildings, and HVAC upgrades**.

## RESULTS

Loudoun County Public School's efforts with green buildings have resulted in an average of 350,000 kWh of energy savings or more per project.

The **Virginia Energy Efficiency Council**, a member-based 501c3, launched the Energizing Efficiency Campaign in 2023 to further the mission of advancing EE across the state by showcasing incredible work being done in our communities and inspiring others to act.
